

Adiant Capital is Evolving into Qanta Energy: Accelerating the Energy Transition Through Innovative Financing

Adiant is proud to announce its new name: **Qanta Energy**. This rebrand marks a significant milestone in our evolution as we scale our mission to make energy sovereignty accessible for all. More than a name change, it represents a fundamental shift in our business model—from an impact financing fund to a direct producer and operator of decarbonized energy solutions.

“Our new identity reflects our ambition to accelerate the energy transition by combining financial strength with stronger technical and operational expertise. Qanta is here to make energy sovereignty a reality.”

PIERRE-LOÏC CAÏJO, CEO OF QANTA ENERGY

25'000 European households supplied with clean power	CHF 150m deployed across the portfolio since 2010	> 30% IRR delivered by the flagship fund
--	---	---

Beginning in 2010, Adiant built a strong foundation in energy transition and distributed generation. We successfully financed and developed renewable energy projects that currently provide clean power to about 25'000 households across Europe. Over its history, the company deployed more than CHF 150 million across its portfolio, with its flagship fund delivering an IRR in excess of 30%.

But as the energy transition accelerates, the market demands flexible financing solutions that remove barriers for consumers and unlock growth for investors. Qanta embodies this ambition: a next-generation energy

utility that combines financial strength, operational expertise, and digital innovation under one platform.

Our mission is clear: **decarbonize the economy by removing investment barriers.**

Qanta develops, owns, and operates energy systems—renewable energy, district heating networks, and energy efficiency upgrades—under long-term contracts. Consumers pay for energy, not infrastructure. No upfront cost. No risk. Just predictable savings and sustainability.

ABOUT QANTA ENERGY

Qanta Energy is an independent producer and operator of decarbonized energy solutions, dedicated to accelerating the global energy transition. Headquartered in Zug, Switzerland, Qanta develops, owns, and operates renewable energy systems and energy efficiency upgrades under innovative long-term contracts. Our mission is to make energy sovereignty accessible to all by combining financial strength, operational expertise, and digital innovation.
